SKILLS

JavaScript, React.js / Redux, Ruby / Rails, HTML/CSS, SQL, PostgreSQL, R, Git

---

PROJECTS

BrainTrain - *React.js, Ruby/Rails, PostgreSQL*   braintra.in
• A single page flash card app that allows users to score and track their cards.
github.com/jenngeorge/brain-train

Meetup Map - *React.js, Meetup API, Google Maps API*   meetupmap.tech
• This web app helps users search for and view local Meetup events on a map.
github.com/jenngeorge/meetup-react

EXPERIENCE

Software Developer / Senior Teaching Assistant - *App Academy*   1/2017 - 5/2017
Junior Teaching Assistant   9/2016 - 1/2017
• Helped migrate an internal tool from Rails views to a single page app with
React.js (React.js / Rails / PostgreSQL)
• Created the appacademy.io/diversity customer-facing page
• Taught and designed curriculum at a top full stack web development bootcamp
• Directed the design and development of full stack, javascript, and code intensive
projects for 420+ students
• Developed and presented technical lectures and coding demonstrations to
audiences of 70+ students and staff

Web Developer and Marketing Assets - *Equilibrium*   5/2016 - 7/2016
• Designed and developed responsive HTML/CSS email templates
• Developed and deployed Wordpress websites advertising company products
• Created graphics and technical diagrams for sales presentations, used in the final
stages of selling to clients

Web Developer Intern - *Yo*   12/2015 - 4/2016
• Reduced redundancy and created a clean SCSS architecture for the YoPolls app
• Designed and developed new views and styles for a single page flask app

Product Cofounder - *Dialectica*   6/2015 - 12/2015
• Translated business goals into design and development sprints, managed
developers
• Led product design and contributed development to an Angular.js web app
