PROJECTS

BrainTrain: *React.js, Ruby/Rails, Postgres*   Live • Github
• A single page flash card app that allows users to score and track their cards.

Meetup Map: *React.js, Meetup API, Google Maps API*   Live • Github
• This web app helps users search for and view local meetup events on a map.

EXPERIENCE

Senior Teaching Assistant / Software Developer - *App Academy*   9/2016 - 5/2017
• Taught and designed curriculum at a top full stack web development bootcamp
• Developed and presented technical lectures and coding demonstrations
• Improved internal tools used by students and teachers (React.js / Rails / Postgres)
• Contributed UI design and code to customer-facing company websites

UI Designer / Developer - *Equilibrium*   5/2016 - 7/2016
• Designed and developed responsive HTML email templates
• Developed and deployed Wordpress websites advertising company products
• Created graphics and technical diagrams for sales presentations, used in the final stages of selling to clients

UI Developer Intern - *Yo*   12/2015 - 4/2016
• Reduced redundancy and created a clean SCSS architecture for the YoPolls web app
• Designed and developed new views and styles for a single page flask app

Cofounder - *Dialectica*   6/2015 - 12/2015
• Translated business goals into design and development sprints, managed developers
• Led product design and contributed UI development to an Angular web app

UI Designer - *Equilibrium*   2/2015 - 6/2015
• Designed UI and interaction for a location-based mobile video sharing app
• Created redesign mockups for an existing mobile and desktop video application

Mobile App Redesign Team - *Datafox*   10/2014 - 12/2014
• Worked in a team to create wireframes, mockups, and prototypes
• Conducted user research and usability studies

SKILLS

JavaScript, React.js / Redux, Ruby / Rails, Python, HTML/CSS, SQL, Git

---

EDUCATION

UC Berkeley - *BA Cognitive Science*   2015
Curriculum Highlights:
• CS61A The Structure and Interpretation of Computer Programs
• CS61B Data Structures
• CS70 Discrete Mathematics and Probability Theory
• CogSci131 Computational Models of Cognition

Georgia Institute of Technology - *Masters of Science in Computer Science Candidate*
Currently enrolled and studying online part-time. Estimated completion: Spring 2020
